

GitLab و 2026-06-10 · Zabbix

cursor/daily-reports/2026-06-10-20-debops-gitlab-zabbix.md

Worklog summary

- 2026-06-10: GitLab repo taxonomy and namespace refactor planned/executed
- 2026-06-14: Printer 172.16.1.141 incident triage; Zabbix had active problem but SMS transport .failed
- 2026-06-14: Zabbix alertscript fixed and redeployed; end-to-end retrigger validated
- 2026-06-16: Activity log generated from full chat history
- 2026-06-20: Closeout docs + per-prompt usage report + TODO carry-over prepared

Pending items carried forward

- Transfer 4 GitLab projects blocked by registry-tag constraint
- Recover printer network/power path (172.16.1.141) to clear persistent outage

هزینه Cursor

هزینه Cursor

- (Source CSV: local export from Cursor dashboard (2026-06-14 to 2026-06-20 , strategy tokens
- Method: token events bucketed from each prompt timestamp to next prompt timestamp
- Limitation: export window starts at 2026-06-14 , so 2026-06-10 prompt has no direct coverage
- Cost values in export are only Included / Free (no dollar-denominated rows)
