Cursor هزینه

Workspace: /opt/new/debops

Transcript: 9b52136b-ac4b-4a73-973d-697cd6c1e004

Dashboard window requested: 2026-06-14T00:00:00Z — 2026-06-20T23:59:59Z (strategy=token (s

CSV source used: cursor/usage/2026-06-14_2026-06-20.csv (local import)

Live API fetch: failed — session cookie returned WorkOS auth redirect (expired/invalid)

.Security: no browser cookies or session tokens are stored in this repo

Executive Summary

Cash cost in CSV	توکن	رویداد	Scope
\$0.00 (905— Included, 10— Free)	809,713,176	915	Account, 2026-06-14..20
Included	217,262,358	158	Account, 2026-06-19 only
Included	not isolated in CSV	user prompts + tool 2~ turns	This Passbolt chat (est.)

The Cursor export does **not** include conversation IDs, so per-prompt dollar/token billing for this chat .cannot be proven exactly. Engineering attribution below is by date bucket + work phase

This Chat — Prompt Attribution (approximate)

Cost evidence	Work performed	موضوع	Prompt
Falls inside 2026-06-19 account bucket: 217,262,358 tokens total that day across all chats	repo grep, runbook read, SSH to monitoring, curl/DNS probes, route discovery	Open Passbolt	1
Same day bucket; marginal add not separately exported yet	TODO, learnings, cost/daily docs, git push to llfs	Close chat + llfs export	2

Practical takeaway: this chat was small compared with the 2026-06-19 daily total, but the day itself .was heavy because of other long debops chats (Nexus, backups, Cursor tracker, etc.)

Model Breakdown (account-level) 2026-06-19

Tokens	Model
150,169,746	auto
25,466,797	gpt-5.5-medium
24,744,038	agent_review
16,881,777	composer-2.5-fast

How To Refresh The CSV

From an authenticated Cursor browser session (do NOT commit cookies): دستور:

.If the response is HTML/redirect to api.workos.com , log out/in to Cursor and retry

Related Prompt Topics on 2026-06-19 (same cost bucket)

:From earlier debops chats in the same day

- Internal Nexus usage and VPN path for external developers
- (Cursor usage tracker rollout (commit push
- Existing backups audit + daily critical backup plan
- Web UI to toggle backup jobs
