تاریخچه Git

پیام	کامیت	تاریخ
Polish health dashboard glass styling	d611b81	2026-06-21

تغییرات اصلی

خلاصه	مسیر
Glassmorphism styling: layered background, blur, translucent cards, hover states and glow	monitoring/portal/health.html
.Serves /INTERNAL-MONITORING.md from the portal	monitoring/portal/nginx.conf
Copies/mounts the internal monitoring runbook alongside Health assets	scripts/monitoring/deploy-health-dashboard.sh
Lists internal monitoring URLs and default/initial credentials, while keeping real production secrets in .handover	mikrotik/runbooks/INTERNAL-MONITORING.md

یادداشت‌های عملیاتی

- in this chat Health page deploy انجام نشد
- .(git push for debops failed because main is non-fast-forward (ahead 1, behind 2
- Dirty working tree contains many unrelated changes; integrate remote carefully before pushing d611b81
- .Nextcloud remains blocked as an identity portal until AD bind / StartTLS is fixed

گام‌های بعدی

1. Decide whether Health gets quick nginx basic auth or a proper SSO front door
2. If SSO is required, pilot authentik on monitoring with local users first, then connect AD/LDAP .later
3. Resolve debops main divergence safely and push d611b81
4. :Run the Health deploy script and smoke-test

`bash scripts/monitoring/deploy-health-dashboard.sh` دستور:
