Source status

- .The pasted curl range decodes to 2026-06-14T00:00:00Z ... 2026-06-20T23:59:59.999Z
- .A local CSV already exists at cursor/usage/2026-06-14_2026-06-20.csv
- .stored, or committed, The pasted browser cookie/session token انجام نشد,
- Exact cost per natural-language prompt is not derivable from this CSV alone because usage events are not linked to chat prompt text

CSV summary — 2026-06-14 ... 2026-06-20

```
bash /home/hamid/.local/share/llfs/cursor/scripts/fetch-cursor-usage-... دستور:
```

Prompt-level notes

- Sana GPS outage investigation/fix : exact prompt cost unavailable; likely represented within the .2026-06-14 usage slice
- Activity log request : exact prompt cost unavailable; requires a CSV that includes 2026-06-16 and .a mapping from usage events to chat turns
- llfs close explanation : not included in the existing 2026-06-14_2026-06-20 CSV because it .happened on 2026-06-21
